

Shashwat Vaish

shashwatvaish1@gmail.com — +91 7303202941 — Delhi NCR — [Portfolio](#)

Professional Summary

Software Engineer with experience building scalable web applications and cloud-based platforms. Proficient in developing **RESTful services**, authentication systems and **CI/CD** workflows. Built production applications featuring real-time data processing, web scraping, analytics dashboards, and scalable backend services.

Skills

Languages: C++, JavaScript, TypeScript, Python

Frontend/Backend: Next.js, React.js, Tailwind CSS, Node.js, Express.js, FastAPI, REST APIs,

Databases: PostgreSQL, MongoDB, MySQL, NeonDB, Redis, Supabase

Tools & Platforms: Prisma, Mongoose, Docker, Git, Vercel, Postman, Playwright, AWS, Datadog, BugSnag

Core CS: Data Structures & Algorithms, System Design, OOP, DBMS, Operating Systems, Computer Networks

Experience

SDE Intern — Indiagold

May 2026 – Present

- Collaborated with cross-functional teams to develop production features across **web apps**, contributing to **e-KYC**, **LTV** based eligibility, and loan disbursement workflows, improving loan application completion rates by **~15%**
- Refactored core modules of a legacy codebase, reducing **technical debt** and cutting average feature release turnaround time by **~50%**
- Improved **Core Web Vitals** (LCP, CLS) across marketing websites and internal dashboards, cutting LCP by **~30%** and raising average SEO/Lighthouse scores by **~20 points**

Projects

Vibecode Editor — Interactive Online IDE

[vibe-code-editor.app](#)

- Built a browser-based IDE using **WebContainers** and **Monaco Editor** with an interactive **Xterm terminal**, enabling end-to-end application execution entirely in-browser without local setup
- Integrated **Llama-3.1-8B-Instant** via Groq API to provide inline code completion and context-aware chat assistance for debugging and refactoring

Sentra — AI-Powered Feedback Management Platform

[feedback.app](#)

- Engineered a full-stack feedback management platform using **Next.js**, **PostgreSQL**, and **Prisma**, implementing dynamic form schemas, RBAC, and analytics across **10k+** records
- Integrated **LangChain** with the **Groq API** to generate AI-powered feedback summaries, and developed secure REST APIs with authentication, dashboard analytics, and PDF/CSV export functionality.

QuickCompare — Real-Time Price Comparison Engine

[quick-compare.app](#)

- Developed a **FastAPI** backend with async **Playwright** scrapers for live price extraction across Blinkit, Instamart, and similar quick commerce platforms, with **RapidFuzz** for product name normalization
- Designed end-to-end data flow (scraper → processing → Redis cache → REST API → Next.js UI) backed by **Redis**, significantly reducing repeated query latency

Education

B.Tech, Computer Science Engineering

Sept 2023 – May 2027

Bhagwan Parshuram Institute of Technology, New Delhi

CGPA: 8.12/10

Achievements

- Secured **Top 5** at **Ctrl+Alt+Hack (NSUT)** and **Top 10** at the **MAIT Hackathon** among **100+ teams**
- Selected for the **Smart India Hackathon (SIH)** at the college level in **2024** and **2025**
- Solved **400+** algorithmic problems on **LeetCode**; participated in hackathons organized by **Hansraj College, IIIT Delhi**, and **Bennett University**
